

PROFILI GUIDA CATENE

CHAINS GUIDE PROFILES

Le guide sono disponibili in versione semplice, doppia o tripla.

PROFILI GUIDA CATENE - CHAINS GUIDE PROFILES

Realizzate in polietilene ad alto peso molecolare (p.m. oltre 1.000.000). - Colori: nero o verde.
Material high molecular weight polyethylene (m.w. over 1.000.000). - Colour: black or green

Lunghezze standard / Standard length: mt. 2, 3, 4

Peso specifico / Specific weight: 0,94 g/cm³

Coeff. attrito acciaio-polietilene / Friction coefficient steel-polyethylene:
statico / static 0,09 - dinamico / dynamic (a secco / dry) 0,06 (200 gr x 12 cm²)

Dilatazione termico-lineare / Thermic-linear dilatation: 2 mm/M ogni / every 10°
(a partire da una temperatura ambiente di 20° / Starting from an ambient temperature of 20°)

GCS 01 - Profili / Profiles

Durante la fase di progettazione, se si devono impiegare delle guide per cinghie trapezoidali, è opportuno sapere che:

- per svolgere la funzione di trasporto la cinghia deve sporgere dalla superficie della guida
- qualora la cinghia fosse attaccata ad un nastro per trasporto per fungere da guida, dovremmo calcolare la profondità della gola in maniera tale da consentire il perfetto appoggio della superficie inferiore del nastro sul piano superiore della guida.

Le nostre guide hanno una profondità (H) calcolata per far sporgere la cinghia di 3 mm dalla guida.

Guide con la quota (H) diversa dallo standard sono fornibili su richiesta.
